LinkedIn lists 1000s of engineering jobs.

Consider moving to another state – it will benefit you in many ways. Here are some companies, government labs and agencies who do not do military work.

Aerospace: Civilian aircraft

--Airbus; Boeing

Airplane engine manufacturing

--Rolls Royce; General Electric

Bio-Med Engineering:

Siemens Healthcare; Johnson & Johnson; GE Healthcare; Medtronic; Drager; Maquet; Fresenius Medical Care; Stryker

Mechanical Engineering

John Deere; Caterpillar

Materials Engineering

Apple; Intel; Kiewit; NASSCO

Environmental Engineering

San Francisco Estuary Institute; Geosyntec

DOE National Labs

Argonne National Lab; Fermi National Lab; SLAC National Accelerator Lab, Brookhaven National Lab.

Government Agencies such as

NASA, NIST, NOAA, USPTO, USAID, BLM

The Women's International League for Peace and Freedom urges you to carefully consider who you will work for when you graduate from college with your engineering degree.

So Many Options—For Now

Let's think. We know what work in so-called Defense pays, but what will it cost you in terms of privacy?

In your hopes for peace?

Does working for a nuclear weapons manufacturer fit with your personal values?

Your engineering degree is your passport to a marvelous life, use it for Peace and Freedom!

Looking for your first job? Consider the hidden costs of working for a military equipment manufacturer.

You will need a security clearance and that changes where you can go, whom you can meet.

Travel? Where you want to vacation and when? No longer just your choice.

You must compartmentalize your thoughts.

You are liable to being prosecuted for your knowledge if someone else leaks what you know!

What about your social life?

Also limited by security issues.

Scientist: "A colleague and I were talking about rockets and satellites with another colleague who had a security clearance. It was fun to watch him squirm when we were freely talking about concepts in our naivete about the subject while he couldn't say anything. Freedom of speech without a clearance!"

Weapons work can be debilitating over time.

You will watch the news and realize that you have contributed, in a small way, to the violence and suffering out there.

You have options and choices for your 1st job. Conflicts are ended and peace is achieved through diplomatic negotiations.

Be part of the solution. Work for peace!
